Approved By:	Philip Woodnutt

WHC Lab Ltd., Prospect Lower, Newcastle,

Co. Wicklow, Ireland, A63H0K8

# 1. PRODUCT AND COMPANY DETAILS

Name of Product: Banana Split Chemical Name: Saccharomyces cerevisiae

Chemical Family: Kingdom Fungi, species Saccharomyces cerevisiae

Composition: Proteins, nitrogenous substances, sugars, organic acids, DNA, and fat. It has a

high concentration of living, functional microorganisms. Details of the supplier of the safety data sheet

Name of Company: The Wicklow Hops Company t/a WHC Lab Address: WHC Lab, Prospect Lower, Newcastle, Co. Wicklow, Ireland, A63H0K8

**Material Safety Data Sheet Banana Split Dehydrated Yeast** 

**Emergency Contact Numbers** Director - Tony O'Kane: +353 (0)87 948 3590

Quality & Sales - Philip Woodnutt: +353 (0)89 406 8622 Accounts - Judith Moss: +353 (0)86 896 1901

3. INGREDIENT COMPOSITION

4. FIRST AID PROCEDURES

Contact with Eyes:

**Description of first aid procedures** 

In case of an emergency please contact the local emergency services.

2. HAZARDS Classification

This product is not classified as dangerous according to CLP Regulation (EC) no 1272/2008.

**Components** 

Due to cell metabolism, rehydrating Banana Split Dehydrated Yeast may release CO2. It may also release  $CO_2$  if subjected to extremely high temperatures.

68876-77-7 99% Not classified Saccharomyces cerevisiae Sorbitan monostearate 1338-41-6 1% Not classified (Emulsifier E491 - rehydration agent)

If contact occurs, immediately rinse eyes thoroughly with

Concentration

Classification (CLP)

Contact with Eyes:	water for a minimum of 15 minutes.
Contact with Skin:	Use soap and water to wash. When exposed to yeast, some people may experience allergic reactions; in this instance, please contact a dermatologist or other medical provider.
Ingestion:	Consuming too much yeast with a high concentration can result in digestive issues like diarrhea and cramping. In this instance, drink a lot of water.
Inhalation:	In the event of CO <sub>2</sub> release in a closed setting, which occurs when Banana Split Dehydrated Yeast interacts with an aqueous solution, remove the individual to fresh air right away and call the local emergency services.
Allergens*	
Banana Split Dehydrated Yeast does not contain added allergens. *EU Regulation 1169/2011 (Food Information Regulations) (Annex II)	
Symptoms and effects	
Effects both immediate and de	elayed are further indicated in section 11.

## Banana Split Dehydrated Yeast can produce CO<sub>2</sub> at extremely high temperatures. Avoid inhaling combustion fumes.

**Environmental precautions** 

another collection technique.

and using the product.

Advice for fire fighters

Specific risks associated with the substance

5. FIRE FIGHTING MEASURES

**Fire Suppression** 

involved in a fire.

6. ACCIDENTAL RELEASE CONTROLS Safety measures, protective gear, and emergency procedures

Banana Split Dehydrated Yeast is not considered to be environmentally hazardous, but it

In the event of a small or large spill or leak, Banana Split Dehydrated Yeast is solid and shouldn't be handled as hazardous waste. It should be removed using a vacuum cleaner or

Wash with water using gloves, boots, and eye protection. If there is a  $CO_2$  release and you're

Use the appropriate tools or media, such as water, foam, carbon dioxide, or dry powder, if

There is a low risk of fire and explosion, under typical circumstances for handling, storing,

should be disposed of properly, given its high organic content. Techniques and supplies for containment and cleanup

Rehydrated materials should be sent for sewage treatment after being heavily diluted with water. Banana Split Dehydrated Yeast decomposes naturally.

Put on self-contained breathing apparatus and safety gear for firefighters, such as boots, gloves, and goggles etc.

7. HANDLING AND STORAGE

in a closed space, use ventilation or breathing apparatus.

1935/2004 (materials intended for contact with food), EU Regulation 1245/2020 (plastic materials intended for contact with food)), EU Regulation 2023/2006 (GMP for materials intended for contact with food), and FDA CFR 21 (174-179) (USA). Storage and Handling

Storage Conditions: Store at cool to ambient temperatures (ideally 5°C to 15°C), dry, and

Shelf life: 3 years from date of production, if vacuum seal is not broken, and if stored as

Handling: Once opened, re-seal to keep out air and water. For best results, store re-sealed

Banana Split Dehydrated Yeast is available in 500g vacuum-packed silver foil packs. This material complies with relevant food-contact legislation, including, EU Regulation

Note: When added to water or a water solution, Banana Split Dehydrated Yeast releases CO<sub>2</sub>, especially on substrates high in sugars or starch. Ensure adequate ventilation to keep levels below advised exposure limits.

packs in a refrigerator (0°C to 10°C) and use promptly. Please note expiry date on packs prior to opening.

well-ventilated environment.

10. STABILITY/REACTIVITY

High-temperature storage.

Lack of stirring following rehydration.

11. TOXICOLOGICAL INFORMATION Information on toxicological effects

12. ECOLOGICAL INFORMATION

Use air-tight containers. Avoid the container leaking. Control spills and residues by safely destroying them (section 6). To reduce toxicological risks:

Avoid eating, drinking or smoking while performing the procedure, and wash your hands

To prevent fires and explosions: Banana Split Dehydrated Yeast has a low fire and

explosion risk, avoid dusting workplaces while handling and storing it.

8. EXPOSURE CONTROLS

and wear the oxvaen detector. Controlling the CO₂ levels should be possible with just adequate general ventilation. There is no need for specialized respiratory protection unless access to tanks where fermentation is occurring is necessary.

Staff members must wear dust protective masks if Banana Split Dehydrated Yeast is

Before using this product, a thorough risk assessment should be done to determine the best personal protective equipment for the local environment. Equipment for personal
