MSDS-P-9

## **Material Safety Data Sheet LAX Dehydrated Yeast**

#### Name of Product: LAX

1. PRODUCT AND COMPANY DETAILS

**Product** 

Chemical Name: Saccharomyces cerevisiae

Chemical Family: Kingdom Fungi, species Saccharomyces cerevisiae

Composition: Proteins, nitrogenous substances, sugars, organic acids, DNA, and fat. It has a high concentration of living, functional microorganisms.

Details of the supplier of the safety data sheet

Name of Company: The Wicklow Hops Company t/a WHC Lab Address: WHC Lab, Prospect Lower, Newcastle, Co. Wicklow, Ireland, A63H0K8

**Emergency Contact Numbers** Director - Tony O'Kane: +353 (0)87 948 3590

Quality & Sales - Philip Woodnutt: +353 (0)89 406 8622

Accounts - Judith Moss: +353 (0)86 896 1901

In case of an emergency please contact the local emergency services.

2. HAZARDS

Classification This product is not classified as dangerous according to CLP Regulation (EC) no 1272/2008.

#### release CO<sub>2</sub> if subjected to extremely high temperatures.

Due to cell metabolism, rehydrating LAX Dehydrated Yeast may release CO2. It may also

3. INGREDIENT COMPOSITION

Saccharomyces cerevisiae

4. FIRST AID PROCEDURES

Contact with Eyes:

**Description of first aid procedures** 

**Components** 

Sorbitan monostearate 1338-41-6 1% Not classified (Emulsifier E491 - rehydration agent)

water for a minimum of 15 minutes.

Cas Registry Number

68876-77-7

Concentration

99%

If contact occurs, immediately rinse eyes thoroughly with

Use soap and water to wash. When exposed to yeast, some

Classification (CLP)

Not classified

Contact with Skin:	people may experience allergic reactions; in this instance,
	please contact a dermatologist or other medical provider.
	Consuming too much yeast with a high concentration can
Ingestion:	result in digestive issues like diarrhea and cramping. In this
	instance, drink a lot of water.
	In the event of CO <sub>2</sub> release in a closed setting, which occurs
Inhalation:	when LAX Dehydrated Yeast interacts with an aqueous
	solution, remove the individual to fresh air right away and
	call the local emergency services.
Allergens*	
LAX Dehydrated Yeast does not contain added allergens.	
*EU Regulation 1169/2011 (Food Information Regulations) (Annex II)	
Symptoms and effects	
Effects both immediate and delayed are further indicated in section 11.	
5. FIRE FIGHTING MEASURES	
Fire Communication	

6. ACCIDENTAL RELEASE CONTROLS Safety measures, protective gear, and emergency procedures

Wash with water using gloves, boots, and eye protection. If there is a  $CO_2$  release and you're

LAX Dehydrated Yeast is not considered to be environmentally hazardous, but it should be

Rehydrated materials should be sent for sewage treatment after being heavily diluted with

In the event of a small or large spill or leak, LAX Dehydrated Yeast is solid and shouldn't be handled as hazardous waste. It should be removed using a vacuum cleaner or another

**Environmental precautions** 

collection technique.

intended for contact with food), and FDA CFR 21 (174-179) (USA).

packs in a refrigerator (0°C to 10°C) and use promptly. Please note expiry date on packs prior to opening.

in a closed space, use ventilation or breathing apparatus.

disposed of properly, given its high organic content. Techniques and supplies for containment and cleanup

**Packaging Materials** LAX Dehydrated Yeast is available in 500g vacuum-packed silver foil packs. This material complies with relevant food-contact legislation, including, EU Regulation 1935/2004 (materials intended for contact with food), EU Regulation 1245/2020 (plastic

materials intended for contact with food)), EU Regulation 2023/2006 (GMP for materials

#### Shelf life: 3 years from date of production, if vacuum seal is not broken, and if stored as outlined above.

Handling: Once opened, re-seal to keep out air and water. For best results, store re-sealed

For safe manipulation: Use air-tight containers. Avoid the container leaking. Control spills and residues by safely destroying them (section 6).

Avoid eating, drinking or smoking while performing the procedure, and wash your hands

**Conditions** When added to water or a water solution, LAX Dehydrated Yeast releases CO2, especially on

If the room isn't ventilated after rehydrating, open the door about two minutes beforehand,

substrates high in sugars or starch; ensure adequate ventilation to keep levels below

Note: When added to water or a water solution, LAX Dehydrated Yeast releases CO<sub>2</sub>,

To reduce toxicological risks:

advised exposure limits.

and wear the oxygen detector.

protection should adhere to the applicable EN standard.

### Use the appropriate tools or media, such as water, foam, carbon dioxide, or dry powder, if involved in a fire. Specific risks associated with the substance There is a low risk of fire and explosion, under typical circumstances for handling, storing, and using the product. LAX Dehydrated Yeast can produce CO<sub>2</sub> at extremely high temperatures. Avoid inhaling combustion fumes. Advice for fire fighters Put on self-contained breathing apparatus and safety gear for firefighters, such as boots, gloves, and goggles etc.

# water. LAX Dehydrated Yeast decomposes naturally.

7. HANDLING AND STORAGE

Storage and Handling

Storage Conditions: Store at cool to ambient temperatures (ideally 5°C to 15°C), dry, and well-ventilated environment.

especially on substrates high in sugars or starch. Ensure adequate ventilation to keep levels below advised exposure limits. **Precautions** To prevent fires and explosions: LAX Dehydrated Yeast has a low fire and explosion risk, avoid dusting workplaces while handling and storing it.

Controlling the CO₂ levels should be possible with just adequate general ventilation. There is no need for specialized respiratory protection unless access to tanks where fermentation is occurring is necessary. Staff members must wear dust protective masks if LAX Dehydrated Yeast is handled roughly as it may rise up dust.

Total Yeast Plate Count Cfu/g  $1.3 \times 10^{10}$ >1010  $1.9 \times 10^{10}$  $> 1.9 \times 10^{10}$ Direct Live Cell Count Cells/g Lactic Acid Bacteria Cfu/g < 103 < 10 Acetic Acid Bacteria < 10 Cfu/g < 104

#### **Chemical stability** Stable when stored according to recommendations. Chemical stability of this material is guaranteed by the storage and handling conditions. 11. TOXICOLOGICAL INFORMATION Information on toxicological effects Toxicity: Even at high doses, there is no acute toxicity. Large doses may irritate the digestive tract when consumed. Oral: For typical industrial handling, the risk is low. May irritate the respiratory tract. For typical industrial Respiratory: handling, the risk is low. May irritate skin. For typical industrial handling, the risk is Skin irritation: Sensitization: Possible allergic sensitization. 12. ECOLOGICAL INFORMATION **GMO** LAX Dehydrated Yeast does not contain genetically modified organisms or materials. This product is not dangerous to the environment with respect to mobility, persistency and degradability, bio-accumulative potential, aquatic toxicity, and other data relating to ecotoxicity.

#### 15. REGULATORY INFORMATION This product is used in the food industry and contains no health-hazardous substances.
